About Me

Prolific, Software developer with 2 years of professional experience, specializing in modern JavaScript frameworks like React Js. I'm passionate about optimizing development and collaborating with visionary entrepreneurs. My Computer Science background and practical experience in IT automation and healthcare platforms prepare me for innovative projects.

Relevant Experience

Metacube Software Pvt. Ltd. Feb 2022 – Present

Frontend Software Engineer

Readibots · Dec 2022 – Present · **Canada**

Readibots is an IT automation platform. Readibots transforms manual, laborious IT tasks into well-oiled predictable, streamlined, repeatable processes. This results in a lean, cutting-edge IT group that executes with maximum efficiency and at lowest cost.

Skills:- ReactJs · ECMAScript · TypeScript · Hooks · Redux-Toolkit · SWR · Vite · Material-UI · Git · Devextreme · Cascading Style Sheets (CSS) · Context API · Storybook· Jest · Puppeteer · enzyme · Atlassian · Jira · Confluence · Agile Methodologies

Responsibilities :-
- Gathered client requirements, ensured business comprehension, and delivered responsively.
- Developed reusable React components, wrote unit tests for React components using Jest and Enzyme, and created end-to-end test cases with Jest-Puppeteer.

Project Participation History:-

Dashboards:- Dashboards with KPI Cards and Charts to show savings with readibots automation products.

Resource Cleanup Survey :- Get user feedback to guide the cleanup process(Bot).

Microsoft 365 Mananger:- Its used to manage users, groups, licenses and mailboxes of the Microsoft 365 environment.

onMessage :- Seamlessly integrating with Teams, SMS, and email, to precisely target and deliver messages to your workforce. From high-volume message delivery and multi-channel options to advanced mail-merge and direct calendar injection, OnMessage ensures your messages are heard, understood, and acted upon with Analytics.

Frontend Software Engineer

Truro Analytics · Feb 2022 – Dec 2022 · **USA**

Truro offers a healthcare platform facilitating patient appointment scheduling and automated calls for due appointments. The system supports double booking of doctor slots with advanced scheduling optimizations, maintains call lists for booked appointments, and prioritizes patients expecting slots in short call lists.

Skills: React.js · JavaScript · TypeScript · Redux.js · Hooks · mutation · GraphQL · modular css · Jira · Jest · Puppeteer · enzyme · Cascading Style Sheets (CSS) · Storybook
